PROJECTS

Dynamic Blog Platform

- Developed a dynamic blog platform using React.js and Firebase, combining the power of a responsive React front-end with real-time data storage and authentication through Firebase.
- This project seamlessly integrates user-friendly interfaces with Firebase's backend capabilities, creating an efficient and engaging blogging experience.

Deployment Link: <https://blogproject-4caa5.web.app/>

Expense Tracker

- Developed a user-friendly expense tracker using React.js and Firebase.
- This application not only efficiently manages expenses but also provides users with a clear overview of their balance.
- The dynamic React interface seamlessly integrates with Firebase's real-time data storage, ensuring a smooth and effective expense tracking experience.
